

NEW RELEASE

TAYLOR ALUMINUM BATTERY BOXES NOW AVAILABLE IN NEW SIZES TO FIT OPTIMA AND ODYSSEY BATTERIES

Taylor has expanded its offering of Aluminum Battery Boxes to include two new sizes to accommodate Optima and Odyssey performance batteries. The lightweight 3-piece .040" aluminum box features the Taylor logo embossed on the lid and allows full access to the battery without having to remove it from the box. The box hard mounts the battery to the frame of the vehicle and complies with NHRA Rule 8:1. Taylor Aluminum Battery Boxes include a heavy duty battery hold down and all necessary spacers and mounting hardware. Some models of the new Battery Boxes also include battery cable kits, depending on application.

Taylor Aluminum Battery Boxes are ideal for racing, street rod and custom applications. The new 200 Series box fits Optima Red and Yellow Top along with Odyssey 1500 Series batteries. Taylor's 300 Series box fits Odyssey PC925 and PC1200 Series batteries.

For more information on all three of Taylor's Aluminum Battery Box models as well as the entire line of the finest high performance and racing electrical products and accessories, please contact:
