

HEI "MAG" Distributor

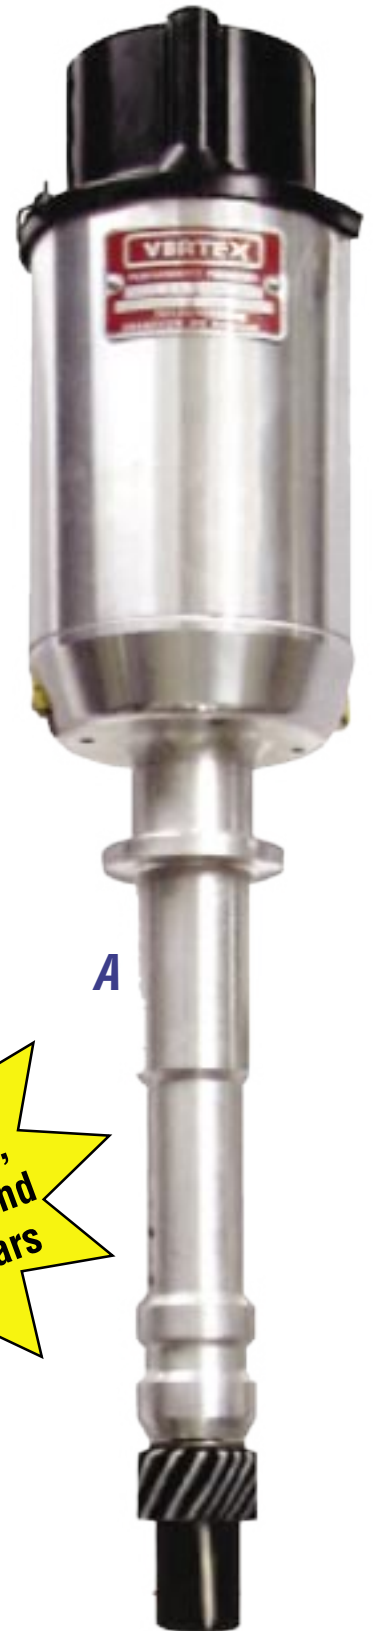

The Vertex "MAG" distributor is a completely self-contained unit that needs only a 12-volt DC power source. The design incorporates the look of our Famous Vertex Magneto with a 42,000 Volt Internal HEI Coil and Magnetic Breakerless Ignition Control Module which provides maximum spark energy and efficiency. A smaller compact unit designed for tight engine compartments.

Features:

- Surface mounted components for greater efficiency, less RF interference and improved ground plane.
- Stable ignition timing through 8500 RPM.
- Factory set 12° BTDC fixed centrifugal advance.
- Withstands high temperature operation.
- All aluminum CNC precision machined construction for added strength and reliability.
- Totally maintenance free unit with easy 3-wire lead hookup and .8 ohm Ballast Resistor.
- All units come standard with steel gear (A); bronze gear (B) optional at an additional cost.
- Optional "polished" finish available; Add "D" to Part Number.

Dimensions (Small Block Chevrolet Std Height Block: 540000):

- Height from mounting surface collar to crown of cap = 9.04 inches
- Diameter at widest point of cap = 3.77 inches

**Ideal for
Street Rods,
Nostalgia and
Muscle Cars**
